Education

The Pennsylvania State University | State College, PA   **PRESENT - CONTINUING**
Bachelor of Science in **Software Engineering**

Coding Dojo | Bellevue, WA   **SEP 2018 - DEC 2018**
Honors: **Triple Black Belt Honors Graduate**

Experience

SOFTWARE ENGINEER | ELEVĀT   **JUNE 2019 - PRESENT**

- Software Development Engineer working within an agile development environment with other developers and product owners to scope, architect, develop and deliver world-class IoT software solutions
- Participate in highly visible full stack web and mobile development using various technologies such as React, PostgreSQL, Azure IoT Services, Azure Cloud, etc
- Design and implement highly scalable solutions and architectures using the most appropriate design patterns

SOFTWARE ENGINEER | XEMELGO   **MAY 2019 - JUNE 2019**

- Worked on various high visibility Industrial IoT software for Industry 4.0 smart manufacturing implementing cloud, mobile, computer vision, and AI technologies
- Resolved compatibility and responsiveness issues across multiple platforms, devices, and browsers such as web, mobile, and legacy browsers

Projects & Awards

TESSELLOSCORE | 1ST PLACE @DEFHACKS 2019 | DISRUPT CREDIT RATING INDUSTRY

- Designed and developed software for a new universal, transparent, and distributed credit score system
- Implemented MongoDB for highly scalable big data storage, Express.js and Node.js for client-to-server communication, and Angular for a dynamic front-end experience
- Integrated a Ridge Regression model to deliver a smart, adaptive, and self-improving credit algorithm
- GitHub Repository: https://github.com/jawang94/tesselloscore

FANSCOOP | 1ST PLACE @SACHACKS 2018 | BEST USE OF HERE.COM API

- Implemented an application that allows Sacramento Kings fans to carpool to venues during game-time, thereby fostering fan spirit, increasing revenue for the organization while cutting down on carbon emissions simultaneously
- Utilized React Native to deliver a modern, seamless, and engaging UI and UX
- GitHub Repository: https://github.com/jawang94/fanscoop
